

**IN THE UNITED STATES DISTRICT COURT  
FOR THE DISTRICT OF MAINE**

RAYMOND ANDERSON,

Plaintiff,

v.

MONSANTO COMPANY,

Defendant.

Civil Action No.: \_\_\_\_\_

**DEMAND FOR JURY TRIAL**

**COMPLAINT**

NOW COMES Plaintiff, Raymond Anderson, ("Plaintiff"), by and through the undersigned attorneys, Fitzgerald Law Group, LLC, and bring this action against Defendant, Monsanto Company, for personal injuries suffered as a proximate result of Plaintiff's use of the herbicide Roundup®, containing the active ingredient glyphosate. Plaintiff makes the following allegations based upon individual personal knowledge as to Plaintiff's own acts, and upon information and belief, as well as upon Plaintiffs' attorneys' investigative efforts as to Defendant's actions and misconduct and in support alleges as follows:

**NATURE OF THE CASE**

1. This is an action for damages suffered by Plaintiff as a direct and proximate result of Defendant's negligent, wrongful and fraudulent conduct in connection with the design, development, manufacture, testing, packaging, promoting, marketing, advertising, distribution, labeling, and/or sale of the herbicide Roundup®, containing the active ingredient glyphosate.

2. Plaintiff maintains that Roundup® and/or glyphosate is defective, dangerous to human health, unfit and unsuitable to be marketed and sold in commerce, and lacked proper warnings and directions as to the dangers associated with its use by consumers.

3. Plaintiff's injuries, like those striking thousands of similarly situated victims across the United States, were avoidable.

4. "Roundup®" used herein refers to all formulations of Defendant's Roundup® products, including, but not limited to, Roundup® Concentrate Poison Ivy and Tough Brush Killer 1, Roundup® Custom Herbicide, Roundup® D-Pak herbicide, Roundup® Dry Concentrate, Roundup® Export Herbicide, Roundup® Fence & Hard Edger 1, Roundup® Garden Foam Weed & Grass Killer, Roundup® Grass and Weed Killer, Roundup® Herbicide, Roundup® Original 2k herbicide, Roundup® Original II Herbicide, Roundup® Pro Concentrate, Roundup® Prodry Herbicide, Roundup® Promax, Roundup® Quik Stik Grass and Weed Killer, Roundup® Quikpro Herbicide, Roundup® Rainfast Concentrate Weed & Grass Killer, Roundup® Rainfast Super Concentrate Weed & Grass Killer, Roundup® Ready-to-Use Extended Control Weed & Grass Killer 1 Plus Weed Preventer, Roundup® Ready-to-Use Weed & Grass Killer, Roundup® Ready-to-Use Weed and Grass Killer 2, Roundup® Ultra Dry, Roundup® Ultra Herbicide, Roundup® Ultramax, Roundup® VM Herbicide, Roundup® Weed & Grass Killer Concentrate, Roundup® Weed & Grass Killer Concentrate Plus, Roundup® Weed & Grass killer Ready-to-Use Plus, Roundup® Weed & Grass Killer Super Concentrate, Roundup® Weed & Grass Killer1 Ready-to-Use, Roundup® WSD Water Soluble Dry Herbicide Deploy Dry Herbicide, or any other formulation of containing the active ingredient glyphosate.

#### **JURISDICTION AND VENUE**

5. This Court has jurisdiction over Defendant and this action pursuant to 28 U.S.C. § 1332 because the amount in controversy between Plaintiff and Defendant exceeds Seventy-Five Thousand Dollars (\$75,000.00), exclusive of interest and costs, and because there is complete diversity of citizenship between Plaintiff and Defendant as Defendant is incorporated and has its principal place of business outside of the state in which the Plaintiff resides.

6. The Court also has supplemental jurisdiction pursuant to 28 U.S.C. § 1337.
7. Venue is proper within this district pursuant to 28 U.S.C. § 1331 in that Defendant conducts business here and is subject to personal jurisdiction in this district. Additionally, Defendant sells, markets, and/or distributes Roundup® within the State of Maine. Also, a substantial part of the acts and/or omissions giving rise to these claims occurred within this district namely Plaintiff's use of Roundup and subsequent diagnosis of and treatment for non-Hodgkin's lymphoma.

#### **TAG ALONG ACTION**

8. This is a potential tag-along action and, in accordance with 28 U.S.C. § 1407, it should be transferred to the United States District Court for the Northern District of California for inclusion in *In re: Roundup Products Liability Litigation*, MDL No. 2741 (Hon. Vince Chhabria).

#### **PARTIES**

9. Plaintiff, Raymond Anderson, is, and at all relevant times was, a resident and citizen of Bath, Maine. Plaintiff brings this action for personal injuries sustained by exposure to Roundup® (“Roundup®”) containing the active ingredient glyphosate and the surfactant polyethoxylated tallow amine (“POEA”). As a direct and proximate result of being exposed to Roundup®, Plaintiff, Raymond Anderson, developed non-Hodgkin's lymphoma.

10. Defendant, Monsanto Company (Defendant” or “Monsanto”), is a Delaware corporation, with its principal place of business located at 800 North Lindbergh Avenue, St. Louis, Missouri 63167. At all times relevant, Defendant was registered and authorized to do business in the State of Maine and was doing business in the State of Maine. Defendant's registered agent for service of process in Maine is Corporation Service Company, 45 Memorial Circle, Augusta, Maine 04330.

11. Defendant advertises and sells goods, specifically Roundup®, in the State of Maine.

12. Defendant transacted and conducted business within the State of Maine that relates to the allegations in this Complaint.

13. Defendant derived substantial revenue from goods and products used in the State of Maine.

14. Defendant expected or should have expected its acts to have consequences within the State of Maine, and derived substantial revenue from interstate commerce.

15. Defendant is engaged in the business of designing, developing, manufacturing, testing, packaging, marketing, distributing, labeling, and/or selling Roundup®.

16. Upon information and belief, Defendant purposefully availed itself of the privilege of conducting activities within the State of Maine, thus invoking the benefits and protections of its laws.

17. Upon information and belief, Defendant did design, sell, advertise, manufacture and/or distribute Roundup®, with full knowledge of its dangerous and defective nature.

### **FACTUAL ALLEGATIONS**

18. At all relevant times, Defendant was in the business of, and did, design, research, manufacture, test, advertise, promote, market, sell, distribute, and/or has acquired and is responsible for the commercial herbicide Roundup®.

19. Monsanto is a multinational agricultural biotechnology corporation based in St. Louis, Missouri and is the world's leading producer of glyphosate.

20. Defendant discovered the herbicidal properties of glyphosate during the 1970's and subsequently began to design, research, manufacture, sell and distribute glyphosate based "Roundup®" as a broad-spectrum herbicide.

21. Glyphosate is the active ingredient in Roundup®.

22. Glyphosate is a broad-spectrum herbicide used to kill weeds and grasses known to compete with commercial crops grown around the globe.

23. Glyphosate is a “non-selective” herbicide, meaning it kills indiscriminately based only on whether a given organism produces a specific enzyme, 5-enolpyruvylshikimic acid-3-phosphate synthase, known as EPSP synthase.

24. Glyphosate inhibits the enzyme 5-enolpyruvylshikimic acid-3-phosphate synthase that interferes with the shikimic pathway in plants, resulting in the accumulation of shikimic acid in plant tissue and ultimately plant death.

25. Sprayed as a liquid, plants absorb glyphosate directly through their leaves, stems, and roots, and detectable quantities accumulate in the plant tissues.

26. Each year, approximately 250 million pounds of glyphosate are sprayed on crops, commercial nurseries, suburban lawns, parks, and golf courses. This increase in use has been driven largely by the proliferation of genetically engineered crops, crops specifically tailored to resist the activity of glyphosate.

27. Defendant is intimately involved in the development, design, manufacture, marketing, sale, and/or distribution of genetically modified (“GMO”) crops, many of which are marketed as being resistant to Roundup® *i.e.*, “Roundup® Ready®.” As of 2009, Defendant was the world’s leading producer of seeds designed to be Roundup® Ready®. In 2010, an estimated 70% of corn and cotton, and 90% of soybean fields in the United States contained Roundup® Ready® seeds.

28. The original Roundup®, containing the active ingredient glyphosate, was introduced in 1974. Today, glyphosate products are among the world’s most widely used herbicides.<sup>1</sup>

29. For nearly 40 years, consumers, farmers, and the public have used Roundup®, unaware of its carcinogenic properties.

#### **REGISTRATION OF HERBICIDES UNDER FEDERAL LAW**

30. The manufacture, formulation and distribution of herbicides, such as Roundup®, are regulated under the Federal Insecticide, Fungicide, and Rodenticide Act (“FIFRA”), 7 U.S.C. § 136 *et seq.* FIFRA requires that all pesticides be registered with the Environmental Protection Agency (“EPA) prior to their distribution, sale, or use, except as described by FIFRA 7 U.S.C. 136a(a).

31. The EPA requires as part of the registration process, among other requirements, a variety of tests to evaluate the potential for exposure to pesticides, toxicity to people and other potential non-target organisms, and other adverse effects on the environment. Registration by the EPA, however, is not an assurance or finding of safety. The determination the EPA makes in registering or re-registering a product is not that the product is “safe,” but rather that use of the product in accordance with its label directions “will not generally cause unreasonable adverse effects on the environment.” 7 U.S.C. § 136(a)(c)(5)(D).

32. FIFRA defines “unreasonable adverse effects on the environment” to mean “any unreasonable risk to man or the environment, taking into account the economic, social, and environmental costs and benefits of the use of any pesticide.” 7 U.S.C. § 136(bb). FIFRA thus

---

<sup>1</sup> *Backgrounder*, History of Monsanto’s Glyphosate Herbicides, June 2005.

requires the EPA to make a risk/benefit analysis in determining whether a registration should be granted or allowed to continue to be sold in commerce.

33. The EPA and the State of Missouri registered Roundup® for distribution, sale, and manufacture in the United States and the State of Missouri.

34. FIFRA generally requires that the registrant, Monsanto, conduct health and safety testing of pesticide products. The government is not required, nor is it able, to perform the product tests that are required of the manufacturer.

35. The evaluation of each pesticide product distributed, sold, or manufactured is completed at the time the product is initially registered. The data necessary for registration of a pesticide has changed over time. The EPA is now in the process of re-evaluating all pesticide products through a Congressionally-mandated process called “re-registration.” 7 U.S.C. § 136a-1. In order to reevaluate these pesticides, the EPA demands the completion of additional tests and the submission of data for the EPA’s review and evaluation.

36. In the case of glyphosate and Roundup®, the EPA had planned on releasing its preliminary risk assessment – in relation to the registration process – no later than July 2015. The EPA completed its review of glyphosate in early 2015 but delayed releasing the assessment pending further review in light of the World Health Organization’s March 24, 2015 finding that glyphosate is a “probable carcinogen” as demonstrated by the mechanistic evidence of carcinogenicity in humans and sufficient evidence of carcinogenicity in animals.

#### **MONSANTO’S FALSE REPRESENTATIONS REGARDING THE SAFETY OF ROUNDUP®**

37. In 1996, the New York Attorney General (“NYAG”) filed a lawsuit against Monsanto based on its false and misleading advertising of Roundup® products. Specifically, the lawsuit challenged Monsanto’s general representations that its spray-on glyphosate-based

herbicides, including Roundup®, were “safer than table salt” and "practically non-toxic" to mammals, birds, and fish. Among the representations the NYAG found deceptive and misleading about the human and environmental safety of Roundup® are the following:

- a) Remember that environmentally friendly Roundup® herbicide is biodegradable. It won't build up in the soil so you can use Roundup® with confidence along customers' driveways, sidewalks and fences ...
- b) And remember that Roundup® is biodegradable and won't build up in the soil. That will give you the environmental confidence you need to use Roundup® everywhere you've got a weed, brush, edging or trimming problem.
- c) Roundup® biodegrades into naturally occurring elements.
- d) Remember that versatile Roundup® herbicide stays where you put it. That means there's no washing or leaching to harm customers' shrubs or other desirable vegetation.
- e) This non-residual herbicide will not wash or leach in the soil. It ... stays where you apply it.
- f) You can apply Accord with “confidence because it will stay where you put it” it bonds tightly to soil particles, preventing leaching. Then, soon after application, soil microorganisms biodegrade Accord into natural products.
- g) Glyphosate is less toxic to rats than table salt following acute oral ingestion.
- h) Glyphosate's safety margin is much greater than required. It has over a 1,000-fold safety margin in food and over a 700-fold safety margin for workers who manufacture it or use it.
- i) You can feel good about using herbicides by Monsanto. They carry a toxicity category rating of 'practically non-toxic' as it pertains to mammals, birds and fish.
- j) “Roundup® can be used where kids and pets will play and breaks down into natural material.” This ad depicts a person with his head in the ground and a pet dog standing in an area which has

been treated with Roundup®.<sup>2</sup>

38. On November 19, 1996, Monsanto entered into an Assurance of Discontinuance with NYAG, in which Monsanto agreed, among other things, “to cease and desist from publishing or broadcasting any advertisements [in New York] that represent, directly or by implication” that:

- a) its glyphosate-containing pesticide products or any component thereof are safe, non-toxic, harmless or free from risk.
- b) its glyphosate-containing pesticide products or any component thereof manufactured, formulated, distributed or sold by Monsanto are biodegradable
- c) its glyphosate-containing pesticide products or any component thereof stay where they are applied under all circumstances and will not move through the environment by any means.
- d) its glyphosate-containing pesticide products or any component thereof are “good” for the environment or are “known for their environmental characteristics.”
- e) glyphosate-containing pesticide products or any component thereof are safer or less toxic than common consumer products other than herbicides;
- f) its glyphosate-containing products or any component thereof might be classified as “practically non-toxic.”

39. Monsanto did not alter its advertising in the same manner in any state other than New York, and on information and belief still has not done so today.

40. In 2009, France’s highest court ruled that Monsanto had not told the truth about the safety of Roundup®. The French court affirmed an earlier judgment that Monsanto had falsely advertised its herbicide Roundup® as “biodegradable” and that it “left the soil clean.”<sup>3</sup>

## **EVIDENCE OF CARCINOGENICITY IN ROUNDUP®**

41. As early as the 1980's, Monsanto was aware of glyphosate's carcinogenic properties.

42. On March 4, 1985, a group of the Environmental Protection Agency's ("EPA") Toxicology Branch published a memorandum classifying glyphosate as a Category C oncogene.<sup>4</sup> Category C oncogenes are possible human carcinogens with limited evidence of carcinogenicity.

43. In 1986, the EPA issued a Registration Standard for glyphosate (NTIS PB87-103214). The Registration standard required additional phytotoxicity, environmental fate, toxicology, product chemistry, and residue chemistry studies. All of the data required was submitted and reviewed and/or waived.<sup>5</sup>

44. In October 1991 the EPA published a Memorandum entitled "Second Peer Review of Glyphosate." The memorandum changed glyphosate's classification to Group E (evidence of non-carcinogenicity for humans). Two peer review committee members did not concur with the conclusions of the committee and one member refused to sign.<sup>6</sup>

45. In addition to the toxicity of the active molecule, many studies support the hypothesis that glyphosate formulations found in Defendant's Roundup® products are more dangerous and toxic than glyphosate alone.<sup>7</sup> As early as 1991 evidence existed demonstrating that glyphosate formulations were significantly more toxic than glyphosate alone.<sup>8</sup>

46. In 2002, Julie Marc published a study entitled "Pesticide Roundup® Provokes Cell Division Dysfunction at the Level of CDK1/Cyclin B Activation."

<sup>4</sup> Consensus Review of Glyphosate, Casewell No. 661A. March 4, 1985. United States Environmental Protection Agency.

<sup>5</sup> <http://www.epa.gov/opprrd1/reregistration/REDs/factsheets/0178fact.pdf>

<sup>6</sup> Second Peer Review of Glyphosate, CAS No. 1071-83-6. October 30, 1881. United States Environmental Protection Agency.

<sup>7</sup> Martinez et al. 2007; Benachour 2009; Gasnier et al. 2010; Peixoto 2005; Marc 2004

<sup>8</sup> Martinez et al 1991

47. The study found that Defendant's Roundup® caused delays in the cell cycles of sea urchins, while the same concentrations of glyphosate alone proved ineffective and did not alter cell cycles.

48. In 2004, Julie Marc published a study entitled "Glyphosate-based pesticides affect cell cycle regulation." The study demonstrated a molecular link between glyphosate-based products and cell cycle dysregulation.

49. The study noted that "cell-cycle dysregulation is a hallmark of tumor cells and human cancer. Failure in the cell-cycle checkpoints leads to genomic instability and subsequent development of cancers from the initial affected cell." Further, "[s]ince cell cycle disorders such as cancer result from dysfunction of unique cell, it was of interest to evaluate the threshold dose of glyphosate affecting cells."<sup>9</sup>

50. In 2005, Francisco Peixoto published a study showing that Roundup®'s effects on rat liver mitochondria are much more toxic and harmful than the same concentrations of glyphosate alone.

51. The Peixoto study suggested that the harmful effects of Roundup® on mitochondrial bioenergetics could not be exclusively attributed to glyphosate and could be the result of other chemicals, namely the surfactant POEA, or alternatively due to the possible synergy between glyphosate and Roundup® formulation products.

52. In 2009, Nora Benachour and Gilles-Eric Seralini published a study examining the effects of Roundup® and glyphosate on human umbilical, embryonic, and placental cells.

53. The study used dilution levels of Roundup® and glyphosate far below agricultural recommendations, corresponding with low levels of residues in food. The study concluded that

---

<sup>9</sup> Molinari, 2000; Stewart et al., 2003.

supposed “inert” ingredients, and possibly POEA, change human cell permeability and amplify toxicity of glyphosate alone. The study further suggested that determinations of glyphosate toxicity should take into account the presence of adjuvants, or those chemicals used in the formulation of the complete pesticide. The study confirmed that the adjuvants in Roundup® are not inert and that Roundup® is always more toxic than its active ingredient glyphosate.

54. The results of these studies were confirmed in recently published peer-reviewed studies and were at all times available and/or known to Defendant.

55. Defendant knew or should have known that Roundup® is more toxic than glyphosate alone and that safety studies on Roundup®, Roundup®’s adjuvants and “inert” ingredients, and/or the surfactant POEA were necessary to protect Plaintiff from Roundup®.

56. Defendant knew or should have known that tests limited to Roundup®’s active ingredient glyphosate were insufficient to prove the safety of Roundup®.

57. Defendant failed to appropriately and adequately test Roundup®, Roundup®’s adjuvants and “inert” ingredients, and/or the surfactant POEA to protect Plaintiff from Roundup®.

58. Rather than performing appropriate tests, Defendant relied upon flawed industry-supported studies designed to protect Defendant’s economic interests rather than Plaintiff and the consuming public.

59. Despite its knowledge that Roundup® was considerably more dangerous than glyphosate alone, Defendant continued to promote Roundup® as safe.

#### **INTERNATIONAL AGENCY FOR RESEARCH ON CANCER’S CLASSIFICATION OF GLYPHOSATE**

60. The International Agency for Research on Cancer (“IARC”) is the specialized intergovernmental cancer agency the World Health Organization (“WHO”) of the United Nations tasked with conducting and coordinating research into the causes of cancer.

61. An IARC Advisory Group to Recommend Priorities for IARC Monographs during 2015–2019 met in April 2014. Though nominations for the review were solicited, a substance must meet two criteria to be eligible for review by the IARC Monographs: there must already be some evidence of carcinogenicity of the substance, and there must be evidence that humans are exposed to the substance.

62. IARC set glyphosate for review in 2015-2016. IARC uses five criteria for determining priority in reviewing chemicals. The substance must have a potential for direct impact on public health; scientific literature to support suspicion of carcinogenicity; evidence of significant human exposure; high public interest and/or potential to bring clarity to a controversial area and/or reduce public anxiety or concern; related agents similar to one given high priority by the above considerations. Data reviewed is sourced preferably from publicly accessible, peer-reviewed data.

63. On March 24, 2015, after its cumulative review of human, animal, and DNA studies for more than one (1) year, many of which have been in Defendant's possession since as early as 1985, the IARC's working group published its conclusion that the glyphosate contained in Defendant's Roundup® herbicide, is a Class 2A "probable carcinogen" as demonstrated by the mechanistic evidence of carcinogenicity in humans and sufficient evidence of carcinogenicity in animals.

64. The IARC's full Monograph was published on July 29, 2015 and established glyphosate as a class 2A *probable* carcinogen to humans. According to the authors glyphosate demonstrated sufficient mechanistic evidence (genotoxicity and oxidative stress) to warrant a 2A classification based on evidence of carcinogenicity in humans and animals.

65. The IARC Working Group found an increased risk between exposure to glyphosate and non-Hodgkin's lymphoma ("NHL") and several subtypes of NHL, and the increased risk continued after adjustment for other pesticides.

66. The IARC also found that glyphosate caused DNA and chromosomal damage in human cells.

#### **EARLIER EVIDENCE OF GLYPHOSATE'S DANGER**

67. Despite the new classification by the IARC, Defendant has had ample evidence of glyphosate and Roundup®'s genotoxic properties for decades.

68. Genotoxicity refers to chemical agents that are capable of damaging the DNA within a cell through genetic mutations, which is a process that is believed to lead to cancer.

69. In 1997, Chris Clements published "Genotoxicity of select herbicides in *Rana catesbeiana* tadpoles using the alkaline single-cell gel DNA electrophoresis (comet) assay."

70. The study found that tadpoles exposed to Roundup® showed significant DNA damage when compared with unexposed control animals.

71. Both human and animal studies have shown that glyphosate and glyphosate-based formulations such as Roundup® can induce oxidative stress.

72. Oxidative stress and associated chronic inflammation are believed to be involved in carcinogenesis.

73. The IARC Monograph notes that "[s]trong evidence exists that glyphosate, AMPA and glyphosate-based formulations can induce oxidative stress."

74. In 2006 César Paz-y-Miño published a study examining DNA damage in human subjects exposed to glyphosate.

75. The study produced evidence of chromosomal damage in blood cells showing significantly greater damage after exposure to glyphosate than before in the same individuals,

suggesting that the glyphosate formulation used during aerial spraying had a genotoxic effect on exposed individuals.

76. The IARC Monograph reflects the volume of evidence of glyphosate pesticides' genotoxicity noting “[t]he evidence for genotoxicity caused by glyphosate-based formulations is strong.”

77. Despite knowledge to the contrary, Defendant maintains that there is no evidence that Roundup® is genotoxic, that regulatory authorities and independent experts are in agreement that Roundup® is not genotoxic, and that there is no evidence that Roundup® is genotoxic.

78. In addition to glyphosate and Roundup®'s genotoxic properties, Defendant has long been aware of glyphosate's carcinogenic properties.

79. Glyphosate and Roundup® in particular have long been associated with carcinogenicity and the development of numerous forms of cancer, including, but not limited to, non-Hodgkin's lymphoma, Hodgkin's lymphoma, multiple myeloma, and soft tissue sarcoma.

80. Defendant has known of this association since the early to mid-1980s and numerous human and animal studies have evidenced the carcinogenicity of glyphosate and/or Roundup®.

81. In 1985, the EPA studied the effects of glyphosate in mice finding a dose related response in male mice linked to renal tubal adenomas, a rare tumor. The study concluded the glyphosate was oncogenic.

82. In 2003, Lennart Hardell and Mikael Eriksson published the results of two case-controlled studies on pesticides as a risk factor for NHL and hairy cell leukemia.

83. The study concluded that glyphosate had the most significant relationship to NHL among all herbicide studies with an increased odds ratio of 3.11.

84. In 2003, AJ De Roos published a study examining the pooled data of mid-western farmers, examining pesticides and herbicides as risk factors for NHL.

85. The study, which controlled for potential confounders, found a relationship between increased NHL incidence and glyphosate.

86. In 2008, Mikael Eriksson published a population-based case-control study of exposure to various pesticides as a risk factor for NHL.

87. This strengthened previous associations between glyphosate and NHL.

88. In spite of this knowledge, Defendant continued to issue broad and sweeping statements suggesting that Roundup® was, and is, safer than ordinary household items such as table salt, despite a lack of scientific support for the accuracy and validity of these statements and, in fact, voluminous evidence to the contrary.

89. Upon information and belief, these statements and representations have been made with the intent of inducing Plaintiff, the agricultural community, and the public at large to purchase and increase the use of Defendant's Roundup® for Defendant's pecuniary gain, and in fact, did induce Plaintiff to use Roundup®.

90. Defendant made these statements with complete disregard and reckless indifference to the safety of Plaintiff and the general public.

91. Notwithstanding Defendant's representations, scientific evidence has established a clear association between glyphosate and genotoxicity, inflammation, and an increased risk of many cancers, including, but not limited to, NHL, Multiple Myeloma, and soft tissue sarcoma.

92. Defendant knew or should have known that glyphosate is associated with an increased risk of developing cancer, including, but not limited to, NHL, multiple myeloma, and soft tissue sarcomas.

93. Defendant failed to appropriately and adequately inform and warn Plaintiff of the serious and dangerous risks associated with the use of and exposure to glyphosate and/or Roundup®, including, but not limited to, the risk of developing NHL, as well as other severe and personal injuries, which are permanent and/or long-lasting in nature, cause significant physical pain and mental anguish, diminished enjoyment of life, and the need for medical treatment, monitoring and/or medications.

94. Despite the IARC's classification of glyphosate as a class 2A probable carcinogen, Defendant continues to maintain that glyphosate and/or Roundup® is safe, non-carcinogenic, non-genotoxic, and falsely warrant to users and the general public that independent experts and regulatory agencies agree that there is no evidence of carcinogenicity or genotoxicity in glyphosate and Roundup®.

95. Defendant has claimed and continue to claim that Roundup® is safe, non-carcinogenic, and non-genotoxic. These misrepresentations are consistent with Defendant's cavalier approach to investigating and ensuring the safety of its products, the safety of the public at large, and the safety of Plaintiff.

#### **SCIENTIFIC FRAUD UNDERLYING THE SAFETY DETERMINATIONS OF GLYPHOSATE**

96. After the EPA's 1985 classification of glyphosate as possibly carcinogenic to humans (Group C), Monsanto exerted pressure upon the EPA to change its classification.

97. This culminated in the EPA's reclassification of glyphosate to Group E, which was based upon evidence of non-carcinogenicity in humans.

98. In so classifying, the EPA stated that “[i]t should be emphasized, however, that designation of an agent in Group E is based on the available evidence at the time of evaluation and

should not be interpreted as a definitive conclusion that the agent will not be a carcinogen under any circumstances.”

99. On two occasions, the EPA found that laboratories hired by Monsanto to test the toxicity of its Roundup® products for registration purposes committed scientific fraud.

100. In the first instance, Monsanto hired Industrial Bio-Test Laboratories (“IBT”) to perform and evaluate pesticide toxicology studies relating to Roundup®. IBT performed approximately 30 tests on glyphosate and glyphosate-containing products, including 11 of the 19 chronic toxicology studies needed to register Roundup® with the EPA.

101. In 1976, the Food and Drug Administration (“FDA”) performed an inspection of IBT and discovered discrepancies between the raw data and the final report relating to toxicological impacts of glyphosate. The EPA subsequently audited IBT and determined that the toxicology studies conducted for Roundup® were invalid. An EPA reviewer stated, after finding “routine falsification of data” at IBT, that it was “hard to believe the scientific integrity of the studies when they said they took specimens of the uterus from male rabbits.”

102. Three top executives of IBT were convicted of fraud in 1983.

103. In the second incident, Monsanto hired Craven Laboratories (“Craven”) in 1990 to perform pesticide and herbicide studies, including several studies on Roundup®.

104. In March of 1991, the EPA announced that it was investigating Craven for “allegedly falsifying test data used by chemical firms to win EPA approval of pesticides.”

105. The investigation lead to the indictments of the laboratory owner and a handful of employees.

**MONSANTO'S CONTINUING DISREGARD FOR THE  
SAFETY OF PLAINTIFF AND THE PUBLIC**

106. Monsanto claims on its website that “[r]egulatory authorities and independent experts around the world have reviewed numerous long-term/carcinogenicity and genotoxicity studies and agree that there is no evidence that glyphosate, the active ingredient in Roundup® brand herbicides and other glyphosate-based herbicides, causes cancer, even at very high doses, and that it is not genotoxic.”<sup>10</sup>

107. Ironically, the primary source for this statement is a 1986 report by the WHO, the same organization that now considers glyphosate to be a probable carcinogen.

108. Glyphosate, and Defendant’s Roundup® products in particular, have long been associated with serious side effects and many regulatory agencies around the globe have banned or are currently banning the use of glyphosate herbicide products.

109. Defendant’s statements proclaiming the safety of Roundup® and disregarding its dangers misled Plaintiff.

110. Despite Defendant’s knowledge that Roundup® was associated with an elevated risk of developing cancer, Defendant’s promotional campaigns focused on Roundup®’s purported “safety profile.”

111. Defendant’s failure to adequately warn Plaintiff resulted in (1) Plaintiff using and being exposed to glyphosate instead of using another acceptable and safe method of controlling unwanted weeds and pests; and (2) scientists and physicians failing to warn and instruct consumers about the risk of cancer, including NHL, and other injuries associated with Roundup®.

---

<sup>10</sup> Backgrounder - Glyphosate: No Evidence of Carcinogenicity. Updated November 2014. (downloaded October 9 2015)

112. Defendant failed to seek modification of the labeling of Roundup® to include relevant information regarding the risks and dangers associated with Roundup® exposure.

113. The failure of Defendant to appropriately warn and inform the EPA has resulted in inadequate warnings in safety information presented directly to users and consumers.

114. The failure of Defendant to appropriately warn and inform the EPA has resulted in the absence of warning or caution statements that are adequate to protect health and the environment.

115. The failure of Defendant to appropriately warn and inform the EPA has resulted in the directions for use that are not adequate to protect health and the environment.

116. By reason of the foregoing acts and omissions, Plaintiff seeks compensatory damages as a result of Plaintiff's use of, and exposure to, Roundup® which caused or was a substantial contributing factor in causing Plaintiff to suffer from cancer, specifically NHL, and Plaintiff suffered severe and personal injuries which are permanent and lasting in nature, physical pain and mental anguish, including diminished enjoyment of life.

117. By reason of the foregoing acts and omission, Plaintiff is severely and permanently injured.

118. By reason of the foregoing acts and omissions, Plaintiff has endured and, in some categories continues to suffer, emotional and mental anguish, medical expenses, and other economic and non-economic damages, as a result of the actions and inactions of the Defendant.

#### **PLAINTIFF'S EXPOSURE TO ROUNDUP®**

119. Plaintiff, Raymond Anderson, used Roundup® beginning in approximately 1988 for commercial purposes in Maine where he worked in property maintenance for a real estate company.

120. For over twenty years, Plaintiff, Raymond Anderson, sprayed Roundup® on a regular basis. Plaintiff, Raymond Anderson, followed all safety and precautionary warnings during the course of use.

121. Plaintiff, Raymond Anderson, was subsequently diagnosed with non-Hodgkin's lymphoma in approximately November 2008. The development of Plaintiff's non-Hodgkin lymphoma was proximately and actually caused by exposure to Defendant's Roundup® products.

122. As a result of his injury, Plaintiff has incurred significant economic and non-economic damages.

#### **EQUITABLE TOLLING OF APPLICABLE STATUTE OF LIMITATIONS**

123. Plaintiff repeats, reiterates, and re-alleges each and every allegation of this Complaint contained in each of the foregoing paragraphs inclusive, with the same force and effect as if more fully set forth herein.

124. The running of any statute of limitations has been tolled by reason of Defendant's fraudulent concealment. Defendant, through its affirmative misrepresentations and omissions, actively concealed from Plaintiff the true risks associated with Roundup® and glyphosate.

125. At all relevant times, Defendant has maintained that Roundup® is safe, non-toxic, and non-carcinogenic.

126. Indeed, even as of today's date, Defendant continues to represent to the public that "Regulatory authorities and independent experts around the world have reviewed numerous long-term/carcinogenicity and genotoxicity studies and *agree* that there is *no evidence* that glyphosate, the active ingredient in Roundup® brand herbicides and other glyphosate-based herbicides, causes cancer, even at very high doses, and that it is not genotoxic" (emphasis added).<sup>11</sup>

---

<sup>11</sup> Background - Glyphosate: No Evidence of Carcinogenicity. Updated November 2014. (downloaded October 9 2015)

127. As a result of Defendant's actions, Plaintiff was unaware, and could not reasonably know or have learned through reasonable diligence that Roundup® and/or glyphosate contact, exposed Plaintiff to the risks alleged herein and that those risks were the direct and proximate result of Defendant's acts and omissions.

128. As a result of Defendant's actions, Plaintiff's physicians were also unaware, and could not reasonably know or have learned through reasonable diligence that Roundup® and/or glyphosate contact, exposed Plaintiff to the risks alleged herein and that those risks were the direct and proximate result of Defendant's acts and omissions.

129. Furthermore, Defendant is estopped from relying on any statute of limitations because of its fraudulent concealment of the true character, quality and nature of Roundup®. Defendant was under a duty to disclose the true character, quality, and nature of Roundup® because this was non-public information over which Defendant had and continues to have exclusive control, and because Defendant knew that this information was not available to Plaintiff or to distributors of Roundup®. In addition, Defendant is estopped from relying on any statute of limitations because of its intentional concealment of these facts.

130. Plaintiff had no knowledge that Defendant was engaged in the wrongdoing alleged herein. Because of the fraudulent acts of concealment of wrongdoing by Defendant, Plaintiff could not have reasonably discovered the wrongdoing at any time prior. Also, the economics of this fraud should be considered. Defendant had the ability to and did spend enormous amounts of money in furtherance of its purpose of marketing, promoting and/or distributing a profitable herbicide, notwithstanding the known or reasonably known risks. Plaintiff and medical professionals could not have afforded and could not have possibly conducted studies to determine the nature, extent, and identity of related health risks, and were forced to rely on only the Defendant's representations.

Accordingly, Defendant is precluded by the doctrine of fraudulent concealment from relying upon any statute of limitations.

**FIRST CAUSE OF ACTION  
NEGLIGENCE**

131. Plaintiff repeats, reiterates, and re-alleges each and every allegation of this Complaint contained in each of the foregoing paragraphs inclusive, with the same force and effect as if more fully set forth herein.

132. Defendant had a duty to exercise reasonable care in the designing, researching, testing, manufacturing, marketing, supplying, promoting, packaging, sale, and/or distribution of Roundup® into the stream of commerce, including a duty to assure that the product would not cause users to suffer unreasonable, dangerous side effects.

133. Defendant failed to exercise ordinary care in the designing, researching, testing, manufacturing, marketing, supplying, promoting, packaging, sale, testing, quality assurance, quality control, and/or distribution of Roundup® into interstate commerce in that Defendant knew or should have known that using Roundup® created a high risk of unreasonable, dangerous side effects, including, but not limited to, the development of NHL, as well as other severe and personal injuries which are permanent and lasting in nature, physical pain and mental anguish, including diminished enjoyment of life, as well as need for lifelong medical treatment, monitoring, and/or medications.

134. The negligence by the Defendant, its agents, servants, and/or employees, included but was not limited to the following acts and/or omissions:

- a. Manufacturing, producing, promoting, formulating, creating, and/or designing Roundup® without thoroughly testing it;
- b. Failing to test Roundup® and/or failing to adequately, sufficiently, and properly test Roundup®;

- c. Not conducting sufficient testing programs to determine whether or not Roundup® was safe for use; in that Defendant herein knew or should have known that Roundup® was unsafe and unfit for use by reason of the dangers to its users;
- d. Not conducting sufficient testing programs and studies to determine Roundup®'s carcinogenic properties even after Defendant had knowledge that Roundup® is, was, or could be carcinogenic;
- e. Failing to conduct sufficient testing programs to determine the safety of "inert" ingredients and/or adjuvants contained within Roundup®, and the propensity of these ingredients to render Roundup® toxic, increase the toxicity of Roundup®, whether these ingredients are carcinogenic, magnify the carcinogenic properties of Roundup®, and whether or not "inert" ingredients and/or adjuvants were safe for use;
- f. Negligently failing to adequately and correctly warn the Plaintiff, the public, the medical and agricultural professions, and the EPA of the dangers of Roundup®;
- g. Negligently failing to petition the EPA to strengthen the warnings associated with Roundup®;
- h. Failing to provide adequate cautions and warnings to protect the health of users, handlers, applicators, and persons who would reasonably and foreseeably come into contact with Roundup®;
- i. Negligently marketing, advertising, and recommending the use of Roundup® without sufficient knowledge as to its dangerous propensities;
- j. Negligently representing that Roundup® was safe for use for its intended purpose, and/or that Roundup® was safer than ordinary and common items such as table salt, when, in fact, it was unsafe;
- k. Negligently representing that Roundup® had equivalent safety and efficacy as other forms of herbicides;
- l. Negligently designing Roundup® in a manner, which was dangerous to its users;
- m. Negligently manufacturing Roundup® in a manner, which was dangerous to its users;
- n. Negligently producing Roundup® in a manner, which was dangerous to its users;
- o. Negligently formulating Roundup® in a manner, which was dangerous to its users;

- p. Concealing information from the Plaintiff while knowing that Roundup® was unsafe, dangerous, and/or non-conforming with EPA regulations;
- q. Improperly concealing and/or misrepresenting information from the Plaintiff, scientific and medical professionals, and/or the EPA, concerning the severity of risks and dangers of Roundup® compared to other forms of herbicides; and
- r. Negligently selling Roundup® with a false and misleading label.

135. Defendant under-reported, underestimated, and downplayed the serious dangers of Roundup®.

136. Defendant negligently and deceptively compared the safety risks and/or dangers of Roundup® with common everyday foods such as table salt, and other forms of herbicides.

137. At all times relevant, Defendant knew that Roundup® was dangerous and defective, concealed the dangers and risks from Plaintiff, made misrepresentations to Plaintiff and the public in general as to the safety of Roundup® and with full knowledge of the risks associated with Roundup®, without adequate warnings of same, manufactured, designed, packaged, labeled, marketed, advertised, distributed, and sold Roundup® to the general public, and to Plaintiff.

138. Defendant engaged in malicious, fraudulent and grossly negligent conduct toward Plaintiff and the general public, and acted with willful and wanton and/or reckless disregard for the safety of the Plaintiff and the general public.

139. Defendant was negligent and/or violated Maine's law in the designing, researching, supplying, manufacturing, promoting, packaging, distributing, testing, advertising, warning, marketing, and selling of Roundup® in that they:

- a. Failed to use ordinary care in designing and manufacturing Roundup® so as to avoid the aforementioned risks to individuals when Roundup® was used as an herbicide;
- b. Failed to accompany its product with proper and/or accurate warnings regarding all possible adverse side effects associated with the use of Roundup®;

- c. Failed to accompany its product with proper warnings regarding all possible adverse side effects concerning the failure and/or malfunction of Roundup®;
- d. Failed to accompany its product with accurate warnings regarding the risks of all possible adverse side effects concerning Roundup®;
- e. Failed to warn Plaintiff of the severity and duration of such adverse effects, as the warnings given did not accurately reflect the symptoms, or severity of the side effects including, but not limited to, the development of NHL;
- f. Failed to conduct adequate testing, clinical testing and post-marketing surveillance to determine the safety of Roundup®;
- g. Failed to conduct adequate testing, clinical testing, and post-marketing surveillance to determine the safety of Roundup®’s “inert” ingredients and/or adjuvants;
- h. Negligently misrepresented the evidence of Roundup®’s genotoxicity and carcinogenicity; and
- i. Was otherwise careless and/or negligent.

140. Despite the fact that Defendant knew or should have known that Roundup® caused, or could cause, unreasonably dangerous side effects, Defendant continued and continues to market, manufacture, distribute, and/or sell Roundup® to consumers, including the Plaintiff.

141. Defendant knew or should have known that consumers such as the Plaintiff would foreseeably suffer injury as a result of Defendant’s failure to exercise ordinary care, as set forth above.

142. Defendant’s violations of law and/or negligence were the proximate cause of Plaintiff’s injuries, harm and economic loss, which Plaintiff suffered and/or will continue to suffer.

143. As a result of the foregoing acts and omissions, the Plaintiff suffered from serious and dangerous side effects including, but not limited to, NHL, as well as other severe and personal injuries which are permanent and lasting in nature, physical pain and mental anguish, diminished enjoyment of life, and financial expenses for hospitalization and medical care.

144. Defendant's conduct was committed with knowing, reckless, conscious, wanton, willful, and deliberate disregard for the value of human life and the rights and safety of consumers, including Plaintiff, thereby entitling Plaintiff to punitive and exemplary damages so as to punish and deter similar conduct in the future.

145. As a direct, proximate and legal consequence of the defective nature of Roundup® as alleged herein, Plaintiff has suffered and continues to suffer permanent and debilitating injuries and damages, including but not limited to, non-Hodgkin's lymphoma, significant pain and discomfort; and other injuries presently undiagnosed, which all require ongoing medical care. As a further direct, proximate and legal consequence of the defective nature of Roundup®, Plaintiff has sustained and will sustain future damages, including but not limited to the cost of medical care; rehabilitation; home health care; lost wages; loss of earning capacity; mental and emotional distress; and pain and suffering.

**SECOND CAUSE OF ACTION**  
**STRICT PRODUCTS LIABILITY – DESIGN DEFECT**

146. Plaintiff repeats, reiterates, and re-alleges each and every allegation of this Complaint contained in each of the foregoing paragraphs inclusive, with the same force and effect as if more fully set forth herein.

147. At all times relevant, the Defendant designed, researched, manufactured, tested, advertised, promoted, sold, and distributed Roundup® as described herein that was used by the Plaintiff.

148. Defendant's Roundup® was expected to and did reach the usual consumers, handlers, and persons coming into contact with said product, including Plaintiff, without substantial change in the condition in which it was produced, manufactured, sold, distributed, and marketed by the Defendant.

149. At all times relevant, Roundup® was in an unsafe, defective, and inherently dangerous condition, which was dangerous to users, including Plaintiff.

150. The Roundup® designed, researched, manufactured, tested, advertised, promoted, marketed, sold, and distributed by Defendant was defective in design or formulation in that, when it left the hands of the manufacturer and/or suppliers, the foreseeable risks exceeded the purported benefits associated with the design or formulation of Roundup®.

151. The Roundup® designed, researched, manufactured, tested, advertised, promoted, marketed, sold, and distributed by Defendant was defective in design and/or formulation, in that, when it left the hands of the Defendant manufacturers and/or suppliers, it was unreasonably dangerous, unreasonably dangerous in normal use, and it was dangerous to an extent beyond that which would be contemplated by the ordinary consumer, including Plaintiff.

152. At all times herein mentioned, Roundup® was in a defective condition and unsafe, and Defendant knew or had reason to know that said product was defective and unsafe, especially when used in the form and manner as provided by the Defendant. In particular, Defendant's Roundup® was defective in the following ways:

- a. When placed in the stream of commerce, Defendant's Roundup® products were defective in design and formulation and, consequently, dangerous to an extent beyond that which an ordinary consumer would anticipate.
- b. When placed in the stream of commerce, Defendant's Roundup® products were unreasonably dangerous in that they were hazardous and posed a grave risk of cancer and other serious illnesses when used in a reasonably anticipated manner.
- c. When placed in the stream of commerce, Defendant's Roundup® products contained unreasonably dangerous design defects and were not reasonably safe when used in a reasonably anticipated manner.
- d. Defendant did not sufficiently test, investigate, or study its Roundup® products.

- e. Exposure to Roundup® presents a risk of harmful side effects that outweigh any potential utility stemming from the use of the herbicide.
- f. Defendant new or should have known at the time of marketing its Roundup® products that exposure to Roundup® and could result in cancer and other severe illnesses and injuries.
- g. Defendant did not conduct adequate post-marketing surveillance of its Roundup® products.

153. Defendant knew or should have known that at all times relevant its Roundup® was in a defective condition and was and is inherently dangerous and unsafe.

154. Plaintiff was exposed to Defendant's Roundup®, as described herein, without knowledge of Roundup®'s dangerous characteristics.

155. At the time of the Plaintiff's use of and exposure to Roundup®, Roundup® was being used for the purposes and in a manner normally intended, as a broad-spectrum herbicide.

156. Defendant with this knowledge voluntarily designed its Roundup® with a dangerous condition for use by the public, and in particular the Plaintiff.

157. Defendant had a duty to create a product that was not unreasonably dangerous for its normal, intended use.

158. Defendant created a product that was and is unreasonably dangerous for its normal, intended use.

159. Defendant marketed and promoted a product in such a manner so as to make it inherently defective as the product downplayed its suspected, probable, and established health risks inherent with its normal, intended use.

160. The Roundup® designed, researched, manufactured, tested, advertised, promoted, marketed, sold, and distributed by Defendant was manufactured defectively in that Roundup® left the hands of Defendant in a defective condition and was unreasonably dangerous to its intended users.

161. The Roundup® designed, researched, manufactured, tested, advertised, promoted, marketed, sold, and distributed by Defendant reached its intended users in the same defective and unreasonably dangerous condition in which the Defendant's Roundup® was manufactured.

162. Defendant designed, researched, manufactured, tested, advertised, promoted, marketed, sold, and distributed a defective product, which created an unreasonable risk to the health of consumers and to the Plaintiff in particular, and Defendant is therefore strictly liable for the injuries sustained by the Plaintiff.

163. The Plaintiff could not, by the exercise of reasonable care, have discovered Roundup®'s defects herein mentioned or perceived its danger.

164. By reason of the foregoing, the Defendant has become strictly liable to the Plaintiff for the manufacturing, marketing, promoting, distribution, and selling of a defective product, Roundup®.

165. Defendant's defective design, of Roundup® amounts to willful, wanton, and/or reckless conduct by Defendant.

166. The defects in Defendant's Roundup® were the cause or a substantial factor in causing Plaintiff's injuries.

167. As a result of the foregoing acts and omission, the Plaintiff developed NHL, and suffered severe and personal injuries, which are permanent and lasting in nature, physical pain and mental anguish, including diminished enjoyment of life, and financial expenses for hospitalization and medical care.

168. Defendant's conduct was committed with knowing, reckless, conscious, wanton, willful, and deliberate disregard for the value of human life and the rights and safety of consumers,

including Plaintiff, thereby entitling Plaintiff to punitive and exemplary damages so as to punish and deter similar conduct in the future.

169. As a direct, proximate and legal consequence of the defectively designed nature of Roundup® as alleged herein, Plaintiff has suffered and continues to suffer permanent and debilitating injuries and damages, including but not limited to, non-Hodgkin's lymphoma, significant pain and discomfort; and other injuries presently undiagnosed, which all require ongoing medical care. As a further direct, proximate and legal consequence of the defective nature of Roundup®, Plaintiff has sustained and will sustain future damages, including but not limited to the cost of medical care; rehabilitation; home health care; lost wages; loss of earning capacity; mental and emotional distress; and pain and suffering.

**THIRD CAUSE OF ACTION**  
**STRICT PRODUCTS LIABILITY – FAILURE TO WARN**

170. Plaintiff repeats, reiterates, and re-alleges each and every allegation of this Complaint contained in each of the foregoing paragraphs inclusive, with the same force and effect as if more fully set forth herein.

171. Defendant has engaged in the business of selling, testing, distributing, supplying, manufacturing, marketing, and/or promoting Roundup®, and through that conduct have knowingly and intentionally placed Roundup® into the stream of commerce with full knowledge that it reaches consumers such as Plaintiff who are exposed to it through ordinary and reasonably foreseeable uses.

172. Defendant did in fact sell, distribute, supply, manufacture, and/or promote Roundup® to Plaintiff. Additionally, Defendant expected the Roundup® that it was selling, distributing, supplying, manufacturing, and/or promoting to reach – and Roundup® did in fact

reach – consumers, including Plaintiff, without any substantial change in the condition of the product from when it was initially distributed by Defendant.

173. At the time of manufacture, Defendant could have provided warnings or instructions regarding the full and complete risks of Roundup® and glyphosate-containing products because it knew or should have known of the unreasonable risks of harm associated with the use of and/or exposure to such products.

174. At all times herein mentioned, Roundup® was defective and unsafe in manufacture such that it was unreasonably dangerous to the user and was so at the time it was distributed by Defendant and at the time Plaintiff was exposed to and/or ingested the product. The defective condition of Roundup® was due in part to the fact that it was not accompanied by proper and adequate warnings regarding its carcinogenic qualities and possible side effects, including, but not limited to, developing non-Hodgkin's lymphoma as a result of exposure to and use of Roundup®.

175. Roundup® did not contain a warning or caution statement, which was necessary and, if complied with, was adequate to protect the health of those exposed in violation of 7 U.S.C. § 136j(a)(1)(E).

176. Defendant's failure to include a warning or caution statement which was necessary and, if complied with, was adequate to protect the health of those exposed, violated 7 U.S.C. § 136j(a)(1)(E) as well as the laws of the State of Maine.

177. Defendant could have amended the label of Roundup® to provide additional, proper and adequate warnings about the risks of exposure to and use of Roundup® but Defendants made a conscious decision to not do so.

178. This defect caused serious injury to Plaintiff, who used Roundup® in its intended and foreseeable manner.

179. At all times herein mentioned, Defendant had a duty to properly design, manufacture, compound, test, inspect, package, label, distribute, market, examine, maintain supply, provide proper warnings, and take such steps to assure that the product did not cause users to suffer from unreasonable and dangerous side effects.

180. Defendant labeled, distributed, and promoted the aforesaid product that it was dangerous and unsafe for the use and purpose for which it was intended.

181. Defendant failed to warn of the nature and scope of the side effects associated with Roundup®, namely its carcinogenic properties and its propensity to cause or serve as a substantial contributing factor in the development of NHL.

182. Defendant was aware of the probable consequences of the aforesaid conduct. Despite the fact that Defendant knew or should have known that Roundup® caused serious injuries, Defendant failed to exercise reasonable care to warn of the dangerous carcinogenic properties and side effect of developing NHL from Roundup® exposure, even though these side effects were known or reasonably scientifically knowable at the time of distribution. Defendant willfully and deliberately failed to avoid the consequences associated with its failure to warn, and in doing so, Defendant acted with a conscious disregard for the safety of Plaintiff.

183. At the time of exposure, Plaintiff could not have reasonably discovered any defect in Roundup® through the exercise of reasonable care.

184. Defendant, as the manufacturer and/or distributor of the subject product, is held to the level of knowledge of an expert in the field.

185. Plaintiff reasonably relied upon the skill, superior knowledge, and judgment of Defendant.

186. Had Defendant properly disclosed the risks associated with Roundup® products, Plaintiff would have avoided the risk of NHL by not using Roundup® products.

187. The information that Defendant did provide or communicate failed to contain adequate warnings and precautions that would have enabled Plaintiff, and similarly situated individuals, to utilize the product safely and with adequate protection. Instead, Defendant disseminated information that was inaccurate, false, and misleading and which failed to communicate accurately or adequately the comparative severity, duration, and extent of the risk of injuries associated with use of and/or exposure to Roundup® and glyphosate; continued to promote the efficacy of Roundup®, even after it knew or should have known of the unreasonable risks from use or exposure; and concealed, downplayed, or otherwise suppressed, through aggressive marketing and promotion, any information or research about the risks and dangers of exposure to Roundup® and glyphosate.

188. To this day, Defendant has failed to adequately warn of the true risks of Plaintiff's injuries associated with the use of and exposure to Roundup®.

189. As a result of its inadequate warnings, Defendant's Roundup® products were defective and unreasonably dangerous when they left the possession and/or control of Defendant, were distributed by Defendant, and used by Plaintiff.

190. As a direct and proximate result of Defendant's actions as alleged herein, including the defective nature of Roundup® due to its inadequate warnings and precautions, Roundup® was the cause or a substantial factor in causing Plaintiff's injuries as alleged herein.

191. Defendant's conduct was committed with knowing, reckless, conscious, wanton, willful, and deliberate disregard for the value of human life and the rights and safety of consumers,

including Plaintiff, thereby entitling Plaintiff to punitive and exemplary damages so as to punish and deter similar conduct in the future.

192. As a direct, proximate and legal consequence of the inadequate warnings and precautions of Roundup® as alleged herein, Plaintiff has suffered and continues to suffer permanent and debilitating injuries and damages, including but not limited to, non-Hodgkin's lymphoma, significant pain and discomfort; and other injuries presently undiagnosed, which all require ongoing medical care. As a further direct, proximate and legal consequence of the defective nature of Roundup®, Plaintiff has sustained and will sustain future damages, including but not limited to the cost of medical care; rehabilitation; home health care; lost wages; loss of earning capacity; mental and emotional distress; and pain and suffering.

#### **FOURTH CAUSE OF ACTION FRAUDULENT MISREPRESENTATION AND CONCEALMENT**

193. Plaintiff repeats, reiterates, and re-alleges each and every allegation of this Complaint contained in each of the foregoing paragraphs inclusive, in particular ¶¶ 37-118, with the same force and effect as if specifically set forth herein.

194. Defendant has defrauded the agricultural community in general and Plaintiff in particular by misrepresenting the true safety of its Roundup® and by failing to disclose known risks of cancer associated with the exposure to and use of Roundup®.

195. Defendant misrepresented and/or failed to disclose, inter alia, that: glyphosate and its major metabolite aminomethylphosphonic acid (AMPA) could cause cancer; glyphosate and AMPA are known to be genotoxic in humans and laboratory animals because exposure is known to cause DNA strand breaks (a precursor to cancer); glyphosate and AMPA are known to induce oxidative stress in humans and laboratory animals (a precursor to cancer); glyphosate and AMPA interfere with the aromatic amino acids within the human gut, leading to downstream health

conditions including cancer; exposure to glyphosate and AMPA is causally associated with non-Hodgkins lymphoma; and the laboratory tests and any reports based on such testing attesting to the safety of glyphosate were flawed and/or fraudulent.

196. Due to these misrepresentations and omissions, at all times relevant to this litigation, Defendant's Roundup® was misbranded under 7 U.S.C. § 136(g) and its distribution within Maine, and around the United States, was a violation of 7 U.S.C. § 136j and 40 C.F.R. § 56.10(a)(5).

197. Plaintiff relied on the Defendant's misrepresentations and/or material omissions regarding the safety of Roundup® and its active ingredient glyphosate in deciding whether to purchase and/or use the product. Plaintiff did not know, nor could Plaintiff have reasonably have known of the misrepresentations and/or material omissions by Defendant concerning Roundup® and its active ingredient glyphosate.

198. The misrepresentations and/or material omissions that form the basis of this fraud claim are not limited to statements made on the Roundup® labeling, as defined under federal law, it also involves Defendant's representations and omissions of material facts made as part of its promotion and marketing of Roundup®, including on the Internet, television, in print advertisements, etc. Nothing prevented Defendant from disclosing the truth about the risks associated with Roundup® in its promotional efforts outside of the labeling context, using the forms of media and promotion Defendant has traditionally used to promote the product's purported efficacy and benefits.

199. When Defendant made the misrepresentations and/or omissions as alleged herein, it did so with the intent of defrauding and deceiving the public in general, the agricultural

community and Plaintiff, with the intent of inducing the public, the agricultural community and the Plaintiff to purchase and use Roundup®.

200. Defendant made these misrepresentations and/or material omissions with malicious, fraudulent and/or oppressive intent toward Plaintiff and the public generally. Defendant's conduct was willful, wanton, and/or reckless. Defendant deliberately recommended, manufactured, produced, marketed, sold, distributed, merchandized, packaged, promoted and advertised the dangerous and defective herbicide Roundup®. This constitutes an utter, wanton, and conscious disregard of the rights and safety of a large segment of the American public, and by reason thereof, Defendant is liable for reckless, willful, and wanton acts and omissions which evidence a total and conscious disregard for the safety of Plaintiff and others which proximately caused the injuries as set forth herein.

201. As a direct, proximate and legal result of the foregoing acts and omission, the Plaintiff developed NHL, and suffered severe and personal injuries, which are permanent and lasting in nature, physical pain and mental anguish, including diminished enjoyment of life, and financial expenses for hospitalization and medical care.

202. Defendant's conduct was committed with knowing, reckless, conscious, wanton, willful, and deliberate disregard for the value of human life and the rights and safety of consumers, including Plaintiff, thereby entitling Plaintiff to punitive and exemplary damages so as to punish and deter similar conduct in the future.

203. As a direct, proximate and legal consequence of Defendant's fraudulent conduct including the foregoing acts and omissions alleged herein, Plaintiff has suffered and continues to suffer permanent and debilitating injures and damages, including but not limited to, non-Hodgkin's lymphoma, significant pain and discomfort; and other injuries presently undiagnosed, which all

require ongoing medical care. As a further direct, proximate and legal consequence of the defective nature of Roundup®, Plaintiff has sustained and will sustain future damages, including but not limited to the cost of medical care; rehabilitation; home health care; lost wages; loss of earning capacity; mental and emotional distress; and pain and suffering

**FIFTH CAUSE OF ACTION**  
**VIOLATION OF MAINE'S UNFAIR TRADE PRACTICES ACT**  
**(5 M.R.S.A. §§ 205-A – 214)**

204. Plaintiff repeats, reiterates, and re-alleges each and every allegation of this Complaint contained in each of the foregoing paragraphs inclusive, with the same force and effect as if more fully set forth herein.

205. Defendant had a statutory duty to refrain from unfair or deceptive acts or trade practices in the design, development, manufacture, promotion, and/or sale of Roundup®.

206. Had Defendant not engaged in the deceptive conduct described herein, Plaintiff would not have purchased and/or paid for Roundup®, would not have been exposed to Roundup®, would not have developed non-Hodgkin's lymphoma, and would not have incurred related medical care and expenditures.

207. Specifically, Plaintiff and Plaintiff's physicians were misled by the deceptive conduct as described herein.

208. Defendants' deceptive, unconscionable, and/or fraudulent representations and material omissions to Plaintiff, physicians and the general public constituted unfair and deceptive acts and trade practices in violation of 5 M.R.S.A. §§ 205-A – 214.

209. Defendants engaged in wrongful conduct while at the same time obtaining, under false pretenses, substantial sums of money from Plaintiff for the Roundup® that Plaintiff would not have purchased and paid for had Defendants not engaged in unfair and deceptive conduct.

210. Defendants' actions, as alleged herein, constitute unfair competition or unfair, unconscionable, deceptive, and/or fraudulent acts or trade practices in violation of 5 M.R.S.A. §§ 205-A – 214.

211. Plaintiff was injured by the cumulative and indivisible nature of Defendant's conduct. The cumulative effect of Defendant's conduct directed at patients, physicians and consumers was to create a demand for and sell Roundup®. Each aspect of Defendants' conduct combined to artificially create sales of Roundup®.

212. The general public, including Plaintiff, relied upon Defendants' misrepresentations and omissions in determining to purchase Roundup®.

213. By reason of the unlawful acts engaged in by Defendants, Plaintiff has suffered ascertainable loss and damages.

214. As a direct and proximate result of Defendants' wrongful conduct, Plaintiff was damaged by paying in whole or in part for Roundup®. As a direct and proximate result of Defendants' violations 5 M.R.S.A. §§ 205-A – 214, Plaintiff has sustained economic losses and other damages for which Plaintiff is entitled to statutory and compensatory damages, and declaratory relief, in an amount to be proven at trial.

**SIXTH CAUSE OF ACTION**  
**PUNITIVE DAMAGES**

215. Plaintiff repeats, reiterates, and re-alleges each and every allegation of this Complaint contained in each of the foregoing paragraphs inclusive, with the same force and effect as if more fully set forth herein.

216. Plaintiff is entitled to punitive damages because the Defendant's breaches of its duties to Plaintiff were deliberate, intentional, and/or motivated by malice or ill will to Plaintiff.

217. Defendant intentionally misled Plaintiff, the agricultural community, the EPA, the medical community, and the public at large by making false representations about the safety and efficacy of Roundup®.

218. Defendant intentionally downplayed, understated and/or misrepresented their actual knowledge of the potential for serious injury with the use of Roundup® despite available information demonstrating that Roundup® was likely to cause serious injuries to patients exposed to or using Roundup®, including the risk of developing non-Hodgkin's lymphoma and other cancers and serious injuries.

219. At all times relevant, Defendant was in possession of evidence demonstrating that Roundup® caused serious injuries the risk of developing non-Hodgkin's lymphoma. Nevertheless, Defendants continue to market Roundup® by providing false and misleading information to Plaintiff, the agricultural community, the EPA, the medical community, and the public at large with regard to the safety and efficacy of Roundup®.

220. Defendant's outrageous actions as described herein were performed willfully, intentionally, and with malice in their disregard for the rights of the Plaintiff and the general public.

221. Accordingly, Plaintiff seeks and is entitled to punitive or exemplary damages in an amount to be determined at trial.

#### **CONDITIONS PRECEDENT**

222. All conditions precedent to Plaintiffs' right to recover herein and to Defendants' liability have been performed or have occurred.

#### **PRAYER FOR RELIEF**

WHEREFORE, Plaintiff demands judgment against the Defendant on each of the above-referenced claims and causes of action and as follows:

1. Awarding compensatory damages in excess of the jurisdictional amount, including, but not limited to pain, suffering, emotional distress, loss of enjoyment of life, and other non-economic damages in an amount to be determined at trial;

2. Awarding compensatory damages to Plaintiff for past and future damages, including, but not limited to, Plaintiff's pain and suffering and for severe and permanent personal injuries sustained by the Plaintiff including health care costs and economic loss;
3. Awarding economic damages in the form of medical expenses, out of pocket expenses, lost earnings and other economic damages in an amount to be determine at trial;
4. Punitive damages;
5. Pre-judgment interest;
6. Post-judgment interest;
7. Awarding Plaintiff's reasonable attorneys' fees;
8. Awarding Plaintiff the costs of these proceedings; and
9. Such other and further relief as this Court deems just and proper.

**JURY DEMAND**

Plaintiff demands a trial by jury of all causes of action and claims asserted in this Complaint.

Dated: November 15, 2019

Respectfully submitted,
